

Imitation

Teach your child to imitate. Start by copying what they do and then add/change it to see if they copy what you do.

Copy their actions. If they clap you clap, if they point you point, if they touch your nose you touch your nose.

Copy their sounds/words. If they say “ahhh” you say “ahhh”, if they say “bear” you say “bear”, if they growl you growl.

Once they find interest in you copying them, see if they will copy you. If they clap, you clap then blow raspberries.
